FOREWORD

The statistical book contains main indicators characterizing the agricultural sector of the Republic of Belarus for 2012 – 2018. Selected data are provided for a lengthier period.

The statistical book is prepared on the basis of data of exhaustive and sample state statistical surveys as well as administrative data.

The statistical book contains data on the main indicators of agricultural development: agricultural production, production structure of main agricultural products, per capita agricultural production.

The substantial place is given to crop growing and animal husbandry indicators. This publication includes data on agricultural area and its structure by types of farms; area under crops, gross harvest, yield capacity of agricultural crops and perennial plantations. The data on livestock and poultry population, production of main animal products are also included.

Separate section of the publication contains information on agricultural facilities: data on fixed capital investment, production and availability of agricultural machinery.

There are also data on production of basic products of food industry, foreign trade in food goods, consumption of basic food products.

The book also includes data characterizing financial standing of organisations, average prices of agricultural products sold.

The data are presented at the national and regional levels with selected indicators broken down by district.

The data book provides selected indicators of the National List of the Sustainable Development Goal indicators.

Starting from 2016 the information by economic activity is provided in accordance with the national classification of the Republic of Belarus OKPE 005-2011 “Kinds of economic activity”. To ensure comparability, data by economic activity for 2012 – 2015 have been converted accordingly based on the new version of the classification.

Data in value terms are provided in current prices, before 2016 in BYR, from 2016 in BYN (1 BYN = 10 000 BYR).

In several cases the 2018 data are preliminary and are subject to revision in further issues.

Abbreviations:

thous. - thousand
bn - billion
mln - million

hp - horse power
kg - kilogramme
ha - hectare

m² - square metre
dal - decalitre

Explanation of symbols:

– not applicable
0,0 negligible magnitude
... data not available

In several cases insignificant discrepancies between the total and the sum of its components is explained by data rounding.

Relative ratios are calculated on the basis of absolute numbers with smaller units of measure than those presented in the tables.

CONTENTS

	Pg.
1. Main socio-economic indicators	
1.1. Main socio-economic indicators for years 2012 – 2018	12
1.2. Selected indicators of the National List of SDG 2 indicators “End hunger, achieve food security and improved nutrition and promote sustainable agriculture”.	15
2. Characteristics of economic entities	
2.1. Agricultural organisations and private farms by region	16
2.2. Agricultural organisations by legal organisational form.	17
2.3. Agricultural organisations by ownership	18
3. Employment	
3.1. Number of employees in agriculture by educational attainment and age groups.	19
3.2. Payroll number of employees in organisations by region	20
3.3. Nominal gross average monthly earnings of employees by region	21
3.4. Real earnings of employees by region	22
3.5. Graduates from secondary specialised and higher education programmes with specialty in “Agriculture”.	23
3.6. Occupational injuries in agricultural organisations.	23
4. Main indicators of agriculture	
4.1. Agricultural output by type of farm.	25
4.2. Structure of agricultural output by type of farm.	26
4.3. Structure of agricultural output by type of output and type of farm.	26
4.4. Indices of agricultural output	27
4.5. Indices of crop output.	27
4.6. Indices of animal output.	28
4.7. Structure of agricultural output by type in farms of all types	28
4.8. Structure of production of basic agricultural products by type of farm	29
4.9. Indices of agricultural output in farms of all types by region	30
4.10. Agricultural production per capita.	31
4.11. Main indicators of agricultural organisations activity.	32

	Pg.
4.12. Main indicators of private (peasant) farms activity.	33
4.13. Main indicators of household activities.	34
5. Physical Resources of agriculture	
5.1. Manufacture of basic agricultural machinery	36
5.2. Number of basic agricultural machinery and equipment in agricultural organisations	37
5.3. Number of basic agricultural machinery and equipment in agricultural organisations by region	38
5.4. Availability of tractors and combine harvesters in agricultural organisations	40
5.5. Production of mineral fertilizers.	40
5.6. Application of mineral fertilizers in agricultural organisations	41
5.7. Application of mineral fertilizers in agricultural organisations by region	42
5.8. Application of organic fertilizers in agricultural organisations	46
5.9. Application of mineral and organic fertilizers per hectare of ploughland in agricultural organisations (graph)	46
5.10. Application of organic fertilizers in agricultural organisations by region.	47
5.11. Liming of soils in agricultural organisations	48
5.12. Power capacity in agricultural organisations.	48
5.13. Fixed capital investment in agriculture.	48
5.14. Commissioning of production facilities	49
6. Crop growing	
6.1. Agricultural land by land user	50
6.2. Structure of agricultural land by land user	51
6.3. Reclaimed land	52
6.4. Fruit gardening and summer house (dacha) construction	52
6.5. Vegetable gardening	53
6.6. Sown area under basic agricultural crops in farms of all types	53
6.7. Sown area under agricultural crops by crop and type of farm.	54
6.8. Structure of sown area under agricultural crops by crop and type of farm	57
6.9. Sown area under grains and legumes in farms of all types	60
6.10. Area of fruit and berries plantations by type of farm	60

	Pg.
6.11. Sown area under agricultural crops on reclaimed land in agricultural organisations	61
6.12. Total sown area under agricultural crops by type of farm by region	62
6.13. Sown area under grains and legumes by type of farm by region	63
6.14. Sown area under rape by type of farm by region	64
6.15. Sown area under sugar beets by type of farm by region.	64
6.16. Sown area under flax by type of farm by region.	65
6.17. Sown area under potatoes by type of farm by region.	66
6.18. Sown area under vegetables by type of farm by region.	67
6.19. Sown area under forage crops by type of farm by region.	68
6.20. Sown area under basic agricultural crops in agricultural organisations by district.	69
6.21. Gross harvest of basic agricultural crops	81
6.22. Gross harvest of grains and legumes by type	82
6.23. Yield capacity of basic agricultural crops	83
6.24. Yield capacity of grains and legumes by type	84
6.25. Gross harvest of agricultural crops by crop and type of farm	85
6.26. Yield capacity of agricultural crops by type of farm	87
6.27. Gross harvest of fruits and berries by type of farm	90
6.28. Yield capacity of fruits and berries by type of farm	91
6.29. Gross harvest and yield capacity of grains and legumes in agricultural organisations (graph)	92
6.30. Gross harvest and yield capacity of potatoes in agricultural organisations (graph)	92
6.31. Gross harvest and yield capacity of flax fibre in agricultural organisations (graph)	93
6.32. Gross harvest and yield capacity of sugar beets in agricultural organisations (graph)	93
6.33. Gross harvest and yield capacity of vegetables in agricultural organisations (graph)	94
6.34. Gross harvest and yield capacity of rape in agricultural organisations (graph).	94
6.35. Gross harvest and yield capacity of agricultural crops on reclaimed land in agricultural organisations	95
6.36. Gross harvest of grains and legumes by type of farm by region	96
6.37. Gross harvest of rape by type of farm by region	97
6.38. Gross harvest of sugar beets by type of farm by region	97

	Pg.
6.39. Gross harvest of flax fibre by type of farm by region	98
6.40. Gross harvest of potatoes by type of farm by region	99
6.41. Gross harvest of vegetables by type of farm by region	100
6.42. Gross harvest of fruits and berries by type of farm by region	101
6.43. Yield capacity of grains and legumes by type of farm by region	102
6.44. Yield capacity of rape by type of farm by region	103
6.45. Yield capacity of sugar beets by type of farm by region	103
6.46. Yield capacity of flax fibre by type of farm by region	104
6.47. Yield capacity of potatoes by type of farm by region	105
6.48. Yield capacity of vegetables by type of farm by region	106
6.49. Yield capacity of fruit and berries by type of farm by region	107
6.50. Gross harvest and yield capacity of basic agricultural crops in agricultural organisations by district	108

7. Animal husbandry

7.1. Livestock population in farms of all types	125
7.2. Basic livestock population by type of farm	126
7.3. Structure of livestock population by type of farm	127
7.4. Number of poultry, rabbits, and bee families by type of farm	128
7.5. Number of basic livestock and poultry by type of farm by region	129
7.6. Number of basic livestock and poultry in agricultural organisations by district	135
7.7. Production of basic animal products in farms of all types	145
7.8. Production of basic animal products by type of farm	146
7.9. Structure of production of basic animal products by type of farm	147
7.10. Sales of livestock and poultry for slaughter by livestock type and type of farm	148
7.11. Structure of sales of livestock and poultry by livestock type and type of farm	149
7.12. Sales of livestock and poultry for slaughter by type of farm by region	150
7.13. Production of milk by type of farm by region	152
7.14. Production of eggs by type of farm by region	153
7.15. Production of wool (physical weight) by type of farm by region	154

	Pg.
7.16. Sales of livestock and poultry for slaughter in agricultural organisations by district . . .	155
7.17. Production of milk in agricultural organisations by district	159
7.18. Production of milk and average milk yield per cow in agricultural organisations (graph)	163
7.19. Average milk yield per cow by type of farm	163
7.20. Average milk yield per cow by type of farm by region	164
7.21. Average milk yield per cow in agricultural organisations by district	165
 8. Financial standing and prices 	
8.1. Main financial indicators of organisations in agriculture	171
8.2. Status of accounts of organisations in agriculture.	172
8.3. Main financial indicators of agricultural organisations by region	174
8.4. Status of accounts of agricultural organisations by region	177
8.5. Profitability of products sold by agricultural organisations	179
8.6. Average agricultural producer prices	180
8.7. Agricultural producer price indices	180
8.8. Price parity index of industrial and agricultural products	180
 9. Processing of agricultural products 	
9.1. Main indicators of organisations with economic activity in “Manufacture of food, beverages and tobacco products”	182
9.2. Structure of manufacture of food, beverages and tobacco products	183
9.3. Commissioning of production capacities	183
9.4. Manufacture of basic food products and beverages	184
 10. External trade in goods 	
10.1. Volume of foreign trade in agricultural and food products	185
10.2. Share of agricultural and food products in the volume of foreign trade in goods of the Republic of Belarus (graph)	186
10.3. Exports of selected agricultural products and foodstuffs.	187
10.4. Imports of selected agricultural products and foodstuffs	189
10.5. Imports of selected commodities in the Republic of Belarus	192

	Pg.
11. Food balance sheets	
11.1. Level of self-sufficiency in basic agricultural products	193
11.2. Supply and use of meat and meat products	194
11.3. Supply and use of milk and dairy products	194
11.4. Supply and use of eggs and egg products	195
11.5. Supply and use of fish and fish products	195
11.6. Supply and use of potatoes and potato products.	196
11.7. Supply and use of vegetables and cucurbits and their conversion products	196
11.8. Supply and use of fruits and berries and their conversion products	197
11.9. Consumption of basic food products per capita	197
12. Service activities in crop growing and animal husbandry	
12.1. Main indicators of organisations engaged in activities to support crop growing and animal breeding.	198
12.2. Organisations engaged in activities to support crop growing and animal breeding by region and Minsk city	199
12.3. Main indicators of organisations engaged in activities to support crop growing and animal breeding by region and Minsk city.	200
12.4. Main financial indicators of organisations engaged in activities to support crop growing and animal breeding.	201
12.5. Status of accounts of organisations engaged in activities to support crop growing and animal breeding.	201
12.6. Main financial indicators of organisations engaged in activities to support crop growing and animal breeding by region and Minsk city.	202
12.7. Status of accounts of organizations engaged in activities to support crop growing and animal breeding by region and Minsk city.	205

1. MAIN SOCIO-ECONOMIC INDICATORS

Current population estimates as of January 1 are based on the results of the last population census plus the annual number of births and arrivals to a given area and minus the annual number of deaths and departures from a given area. The estimates take into account increase or decrease of population in selected areas due to the changes of their boundaries, as well as changes in urban and rural population caused by changes in administrative and territorial system of the Republic of Belarus i.e. changes of a settlement status (rural-to-urban or urban-to-rural transformation under legislative acts).

Resident population refers to individuals who permanently reside in a given area as well as foreign nationals and stateless persons who temporarily reside in a given area for a year or more.

The population is classified into urban and rural according to the place of residence. In this respect, urban settlements refer to localities that were granted an urban status in compliance with the legislation (cities, urban, industrial and resort settlements). All other settlements are rural.

Payroll number of employees includes employees who worked under employment agreements (contracts) and performed permanent, temporary or seasonal work for a day or more. This includes both actually working employees and persons temporarily absent from work for any reason (annual leave, a leave initiated by employer, temporary disability, or other reason). External multiple job holders and civil-law contractors are not included.

Average annual payroll number of employees is a sum of average monthly number of employees for all months ended from the beginning of the year divided by 12. Average annual payroll number of employees does not include employees on maternity leave, on a leave connected with the adoption of a child under 3 months of age, and a child care leave up to the age of three years.

Nominal gross average monthly earnings are calculated by dividing the gross payroll, including income tax and compulsory insurance contributions of employees, by the average payroll number of employees used for the calculation of the average earnings and by the number of months in the period.

Real earnings is a relative statistical measure characterizing the purchasing power of earnings in the reference period in connection with the changes in prices of consumer goods and services compared with the base period. It is calculated by dividing the nominal gross earnings index by the consumer price index for the same time period.

Gross Domestic Product (GDP) reflects the value of goods and services produced in the country by all types of economic activities and intended for final consumption, capital formation and net exports. GDP by production approach is calculated as the sum of gross values added by economic activities and net taxes on products.

Gross value added reflects the difference between output and intermediate consumption calculated by economic activities.

The Sustainable Development Goals (SDGs) are 17 goals fixed in the 2030 Agenda for Sustainable Development adopted by the United Nations member states at the United Nations Summit in September 2015. These goals refer to various areas of the socio-economic development and have to be achieved by 2030. To monitor the progress in achieving each goal, a list of relevant indicators was developed.

The data book presents selected indicators of SDG 2 End hunger, achieve food security and improved nutrition and promote sustainable agriculture:

2.5.1. Number of plant and animal genetic resources for food and agriculture secured in either medium- or long-term conservation facilities;

2.a.1. The agriculture orientation index for government expenditures; calculated as a ratio of the proportion of agriculture in government spending to the proportion of agriculture in GDP, where agriculture covers agriculture, forestry and fishing sector;

2.a.2. Total official flows (official development assistance plus other official flows) to the agriculture sector.

Fixed capital investment reflects the total costs invested in the acquisition, reproduction and creation of new fixed assets.

Labour productivity in agriculture per employee is measured as a ratio of the output produced in agricultural organisations at current prices to the average payroll number of employees engaged in agricultural production. The index of labour productivity is calculated as a ratio of the index of agricultural output at constant prices to the index of changes in the average payroll number of employees engaged in agricultural production.

1. MAIN SOCIO-ECONOMIC INDICATORS

1.1. Main socio-economic indicators for 2012 – 2018

4. MAIN INDICATORS OF AGRICULTURE

Agricultural output is the total value of material goods produced in the sector both for sale and for internal consumption. Agricultural output includes the value of animal husbandry and crop-growing products, and change in the value of work-in-progress in crop growing.

Crop growing output is the value of raw products obtained from the harvest of the reference year (cereals and legumes, oil seeds, potatoes, sugar beets, flax fibre, forage crops, vegetables, fruits and berries, planting stock (nursery plants), flower products, mushrooms, etc.), value of planting young perennial plantations, changes in the value of work-in-progress in crop growing (costs associated with work done in the reference year for the harvest of the next year (sowing of winter crops, fall-ploughing, etc.).

Animal husbandry output is the value of raw products obtained as a result of raising and economic use of farm animals and poultry (milk, eggs, honey, wool, etc.), expenses related to raising of farm animals and poultry (crop, growth and weight gain), the value of young stock sold for breeding.

Index of agricultural output is a relative statistical measure reflecting changes in agricultural output in the periods compared (in constant prices).

Farms of all types means all groups of agricultural producers. They include:

agricultural organisations defined as legal entities (excluding private farms), their subdivisions with separate balance and main and/ or secondary economic activity in agriculture, excluding provision of services in crop growing and animal husbandry (according to National Classification of Economic Activities of the Republic of Belarus (OKRB 005-2011), groups 011 – 015;

private farms;

household subsidiary plots which are personal subsidiary plots of permanent rural residents, subsidiary plots of individuals, engaged in agricultural production using land plots allotted for construction and/ or maintenance of single-family, terraced residential houses, collective gardening or dacha (summer house) construction.

4.1. Agricultural output by type of farm

(at current prices; million rubles; 2012 – 2015 – billion rubles;)

	2012	2013	2014	2015	2016	2017	2018
Farms of all types							
Total agricultural output	94 864	103 854	128 991	135 378	15 502	18 043	18 843
of which:							
crop output	42 629	47 123	61 350	60 582	7 177	8 464	8 538
animal output	52 235	56 731	67 641	74 796	8 325	9 579	10 305
Agricultural organisations							
Total agricultural output	72 314	80 855	99 964	105 970	12 269	14 303	14 909
of which:							
crop output	25 650	29 472	37 278	36 005	4 428	5 218	5 090
animal output	46 664	51 383	62 686	69 965	7 841	9 085	9 819
Private farms							
Total agricultural output	1 052	1 534	2 212	2 596	291	366	414
of which:							
crop output	856	1 339	1 984	2 309	259	330	375
animal output	196	195	228	287	32	36	39
Household plots							
Total agricultural output	21 498	21 465	26 815	26 812	2 942	3 374	3 520
of which:							
crop output	16 123	16 312	22 088	22 268	2 490	2 916	3 073
animal output	5 375	5 153	4 727	4 544	452	458	447

4.2. Structure of agricultural output by type of farm

(percent of total; at current prices)

	2012	2013	2014	2015	2016	2017	2018
Farms of all types	100	100	100	100	100	100	100
of which:							
agricultural organisations	76.2	77.8	77.5	78.3	79.1	79.3	79.1
private farms	1.1	1.5	1.7	1.9	1.9	2.0	2.2
household plots	22.7	20.7	20.8	19.8	19.0	18.7	18.7

4.3. Structure of agricultural output by type of output and type of farm

(as percentage of total agricultural output; at current prices)

	2012	2013	2014	2015	2016	2017	2018
Farms of all types							
Crop output	44.9	45.4	47.6	44.8	46.3	46.9	45.3
Animal output	55.1	54.6	52.4	55.2	53.7	53.1	54.7
Agricultural organisations							
Crop output	35.5	36.5	37.3	34.0	36.1	36.5	34.1
Animal output	64.5	63.5	62.7	66.0	63.9	63.5	65.9
Private farms							
Crop output	81.3	87.3	89.7	88.9	89.2	90.1	90.4
Animal output	18.7	12.7	10.3	11.1	10.8	9.9	9.6
Household plots							
Crop output	75.0	76.0	82.4	83.1	84.6	86.4	87.3
Animal output	25.0	24.0	17.6	16.9	15.4	13.6	12.7

4.4. Indices of agricultural output
(percent; at constant prices)

Year	Farms of all types	Of which		
		agricultural organisations	private farms	household plots
2010 = 100				
2012	114.0	116.4	154.5	106.4
2013	109.4	112.2	159.9	99.7

5. PHYSICAL RESOURCES OF AGRICULTURE

Availability of specific agricultural machinery in agricultural organisations is a ratio of the number of related machinery as of the end of the year to the sown area (ploughland) under corresponding agricultural crops. Calculated per 1000 hectares of sown area (plough land).

Load rate on agricultural machinery is a ratio of plough land or sown area of agricultural crops to the number of agricultural machinery. Calculated per unit of corresponding type of agricultural machinery.

Power capacity in agricultural organisations is the total capacity of all energy sources supporting production process – mechanical and electric motors, electricity generating plants, and animal draught power.

Power supplied per worker in agricultural organisations is a ratio of total power capacities to the average annual number of workers engaged in agricultural production.

Power supply in agricultural organisations is the ratio of total power capacities to sown area of agricultural crops. Calculated per 100 hectares of sown area.

Fixed capital investment are total costs invested in the acquisition, reproduction and creation of new fixed assets.

5.1. Manufacture of basic agricultural machinery

6. CROP GROWING

Agricultural land is land regularly used for obtaining agricultural products. It includes arable land, fallow land, land under permanent crops, and meadow land. The data are provided by the State Committee for Property of the Republic of Belarus.

Arable land is agricultural land regularly cultivated (plowed) and used under agricultural crops, including perennial grass with period of use specified by the scheme of crop rotation as well as emergency fields, soil area under cover (greenhouses), and clean fallow.

Land under permanent crops is land covered with artificial trees and shrubs (plantations) or plantations of herbaceous perennial plants, intended for fruit harvest, food, technical and medicinal plants, as well as for landscaping.

Sown area is a part of arable land under agricultural crops.

Gross harvest of agricultural crops is the output produced (harvested) from the total sown area under agricultural crops. Gross harvest of grains and legumes is measured in weight after treatment.

Yield capacity of agricultural crops is the average harvest of agricultural products per unit of actually harvested area (per hectare).

6.1. Agricultural land by land user

7. ANIMAL HUSBANDRY

Livestock and poultry population is the number of farm animals – cattle, pigs, sheep, goats, horses and others as well as poultry of all species.

Sales of livestock and poultry for slaughter (in live weight) are sales of all types of livestock and poultry for slaughter through various distribution channels – to meat processing organisations and cool storage facilities; subsidiary production units of organisations; consumers' cooperatives; distributed or sold through catering facilities; sold on the markets or through other distribution channels.

Production of milk is actually yielded milk, including milk consumed in the farms for their own needs. Milk suckled by calves in sucking maintenance is not included.

Average milk yield per cow is calculated as a ratio of milk yielded from dairy heard cows to the average dairy herd population regardless of whether the cows milked or not in the reference period.

Production of eggs is eggs gathered from all kinds of farm poultry, including eggs used for poultry reproduction (incubation), production of egg powder, etc. as well as loss of eggs (breakage, spoilage, etc.)

7.1. Livestock population in farms of all types

(beginning of year; thousand heads)

Year	Cattle		Pigs	Sheep	Goats	Horses

10.2. Share of agricultural and food products in the volume of foreign trade in goods of the Republic of Belarus

(percent)

Exports of agricultural and food products

Imports of agricultural and food products

11. FOOD BALANCE SHEETS

The section presents food balance sheets of selected agricultural products and per capita consumption of basic foodstuffs.

Food balance sheets is a system of statistical indicators which reflect the sources of basic agricultural products, raw supplies and food, and their utilisation. The balance sheets show the flows of products from their production to their final use and allow for the routine analysis of the correlation between the resources and their use as well as for the forecasting of trends on the food market.

The level of self-sufficiency in basic agricultural products reflects the extent to which domestic production is able to meet all the demands of the country and is measured as the percentage ratio of domestic production to domestic consumption. Domestic consumption includes personal consumption of population, industrial use and processing for non-food purposes, and losses.

11.1. Level of self-sufficiency in basic agricultural products

(percent)

	2014	2015	2016	2017	2018
Meat	126.1	132.4	132.1	134.7	135.2
